

ANNEX #07 TECHNICAL DETAILS TASK 3

- A rough Douglas wooden post of approximately 20 x 20 x 150 cm is placed in the middle of 2 underlayment plates of 100 x 100 x 1,8 cm which are screwed together.
- Under the plate are 4 twin-wheel casters mounted (2 with brake and 2 without brake). These wheels rotate completely within the dimensions of the wooden plate.
- The maximum total carrying weight of the set of 4 wheels is 300 kg. The weight of the provided construction is 60 kg.
